Sound & Air Pollution[♦]

For a healthy life, pure environment plays an important role for a healthy life. But, if the new technologies, on one hand, are very beneficial, on the second hand, it dragged the life and health to danger. Therefore, for the protection of natural environment, below mentioned resolutions are made:

1. For all needs, it is important to use low pollution emitting fuel as much as possible and high polluting fuels should be avoided instead of having power and ability.

2. Low polluting fuel should be preferably used in vehicles, which would emit less pollution and any directive made by the government in this respect should be followed.

3. Low quantity of high polluting fuel should be used in generator, etc which are used as a source for electricity and other purposes and the government directives regarding this should be taken into consideration.

4. The solar energy should be used in the areas where it is easy and useful to get solar energy.

5. It is mandatory to follow the rules made by the government to control pollution of factories and workplaces. But, the responsibility lies upon the government to provide facilities.

6. To have control over bad odor and the pollution in the environment, suitable measures should be taken for the unusable parts of the animals

7. Unnecessary use of plastic bags should be avoided and alternative stuffs should be preferred.

8. Tobacco and the products made by it should be avoided, especially in the public places.

9. It is not permissible for a person to relieve in public place. Similarly, relieving in open drainage should be avoided to the possible extent.

10. Spitting in Public places is undesirable and disgusting. Government directions, if there is any, in this regard should be implemented.

---

11.   Excessive use of electronic equipments emitting radiations and rays such as Refrigerator, Washing Machine, Mobile and Air Conditioners, etc should be avoided.

12.   Planting trees has regarded an important activity in Islam. Therefore, cutting of green trees and forests without any need should be avoided.
